

Annual Report 2019/2020

**We support communities to thrive
in the next economy**

Vision / Mission

The Next Economy supports communities struggling with change to stimulate their economy in ways that protect and regenerate both people and the planet.

Our ultimate goal is to transform the economy so that the way we produce, consume, exchange, work and manage surplus:

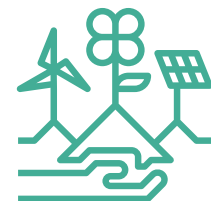

1

Ensures the wellbeing of all people, with everyone having meaningful opportunities to prosper in thriving, healthy communities.

2

Reduces and absorbs carbon emissions across all sectors to mitigate and adapt to climate change impacts.

3

Protects and regenerates natural ecosystems.

Acknowledgement of Country

We wish to acknowledge the Traditional Owners of the land and sea across this great southern land, and pay respects to their Elders past and present. In particular we acknowledge that we live and work on the lands of the Jagera and Turbul nations.

We also wish to acknowledge the thousands of years of traditional practices and culture of First Nations people, and offer our solidarity and support to facilitate true reconciliation through our work. Sovereignty was never ceded.

Chair's Report

The past year marks an important shift in national awareness and discussion, participation and leadership for economic transition. The need for a climate-safe, socially just and regenerate economy has been starkly highlighted by the challenges our local and global community is experiencing as a result of the COVID19 pandemic. It is inspiring to see new ideas, collaboration and action emerge in response, with momentum building around just transition opportunities.

The Next Economy has played an important part in catalysing and supporting this shift in thinking and action - with regional communities, industry and government. The value of this enabling work is increasingly recognised and in demand. Consequently, The Next Economy's team has been leading and contributing to a rapidly growing portfolio of work, ranging from direct support for regional communities seeking to accelerate transition, through to work with senior decision makers on strategy and policy, and capacity building with organisations similarly focused on social, economic and environmental justice.

Key achievements in the past year have included the development and delivery of energy transition forums, development and launch of the *What Queensland Wants* report and the provision of strategic advice and support to just transition alliances across Australia including the Hunter Renewal project, the recently formed Climate Justice Union in Western Australia and the Northern Territory Climate Justice Alliance.

It has been particularly rewarding to see a significant shift in support for The Next Economy's work, including an increase in annual revenue to just under \$500,000 in FY2020. This has enabled growth in our staff team and consequently expanded The Next Economy's depth of impact. Internally, our operations are maturing, and externally the organisation's profile has increased and includes regular national media coverage.

The Next Economy has a highly capable and passionate team of staff and volunteers, who bring empathy, creativity and boldness to their work. I would like to specifically acknowledge the strength of leadership provided by Dr Amanda Cahill over the past twelve months – rapidly growing The Next Economy's role and impact in what has often been a challenging and dynamic political and economic environment.

I would like to recognise the efforts of our directors to effectively fulfill their governance responsibilities then go beyond to support The Next Economy to excel.

We are delighted by the range of experience, networks and commitment they bring to the work we undertake.

I would also like to thank the many individuals and organisations who support The Next Economy. We are most grateful for the resources, encouragement and energy that this growing community contributes.

And so, our work continues. It feels like we are making important steps forward, yet there remains so much to be done. We look forward to working with you all in the coming year to accelerate the transition to an economy that protects and regenerates both people and the planet.

Best wishes,

E. Webb

Lizzie Webb

Chair

CEO's Report

It's with great pleasure that we present our inaugural annual report for The Next Economy Ltd. Over the last 18 months we've seen significant growth.

Highlights for the organisation have been numerous, however those worth particular attention include the development and delivery of energy transition forums to over 450 people across Queensland, including 8 forums on behalf of the Queensland Government in Cairns, Townsville, Gladstone and Rockhampton in 2020.

This led to us launching the What Queensland Wants report that generated intense and positive media attention across both the ABC and News Corp press during August and September 2020, and led to opportunities to work directly with the Queensland Government and a range of energy companies to support the development of transition strategies.

Our work in supporting and building capacity for organisations and alliances working towards a just transition across Australia also led to us working with groups in New South Wales, Western Australia and the Northern Territory, including the Hunter Renewal project, the Gloucester Sustainable Futures group, the Climate Justice Union and the Northern Territory Climate Justice Alliance.

We also expanded our work beyond energy to support a range of food justice and regenerative agriculture programs, including the Mackay-Isaac-Whitsundays Reef Resilience project and the Transforming Australia's Food Systems project.

We delivered a number of national addresses, including the Big Ideas event hosted by Latrobe University in September 2019, the Hobart Lecture in November 2020 and the ABC Facebook Live Event: Generation 2020. I was humbled to receive a 2020 Churchill Fellowship to travel to Europe to study how other countries are building long-term resilience by embracing the energy transition, which I hope to complete once the borders open globally.

None of these achievements would have been possible without the ongoing support of many passionate, capable and dedicated people, to whom I am deeply grateful, including: the best team anyone could wish for in Emma-Kate Rose, Debbie Gibson, Emma Whittlesea, Sharon France and Maddie Eyres. Lizzie Webb, who has not only chaired the board for the last two and a half years, but has offered hands-on, practical support in developing a whole range of systems and policies, as well as provided unwavering moral support.

I'd like to thank all of our board members, particularly the original 'girl power' team of Jarra Hicks, Sandi Middleton, Lisa Hyden, Lauren Haas and Lizzie Webb who supported TNE through the first two years of operation.

The dedicated Transitioning Australia Group (TAG) team members who have accompanied us across Australia, particularly Wendy Farmer, Jarra Hicks, Kristy Walters, Ron Ipsen, Verity Morgan-Schmidt, Dan Musil and Julie Lyford.

Thanks also to Kate Davies and the team at the Climate Media Centre who have provided timely support to launch us into local, state and national media at pivotal moments, as well as our key partner organisations, including the Australian Conservation Foundation, Beyond Zero Emissions, Farmers for Climate Action, IEEFA and the Community Power Agency.

Last but not least, our generous donors, particularly The Morris Family Foundation who have backed The Next Economy from day one and continue to be our greatest champions.

All of this support has meant that The Next Economy was able to move quickly when the results of the 2019 election led to the widespread realisation that Australia would never see meaningful action on climate change unless we were able to bring everyone along with us. It also meant that we were able to share practical support and insights into how we could navigate the challenges of the COVID pandemic in ways that would strengthen social, economic and environmental wellbeing with leaders across government, industry, civil society and regional Australia.

As the climate crisis intensifies and global economic outlooks remain uncertain, there will only be increasing demand for what The Next Economy can offer in terms of advice, support and action. I look forward to continuing to work with you all to keep building a world in which everyone can reach their potential in ways that strengthen and nurture the planet on which we all depend.

In solidarity,

Dr Amanda Cahill

CEO, The Next Economy

About Us

Communities and organisations all over the country are feeling the burden of economic change, often bearing the brunt of policies that don't appreciate the true value of regional economies. Change is inevitable, and with that comes great anxiety. But it also comes with great opportunities. We work alongside communities, industries and governments to harness those opportunities that will work for people and the planet on which we all depend.

We provide a safe and supported structure for communities to move towards a more prosperous, fair and sustainable system. In an atmosphere that is often politically and emotionally charged, we endeavour to create spaces for people to come together, reflect, and develop practical and positive economic solutions that fit with the particular circumstances of each community.

Our Theory of Change (and reason for being)

It is no secret that our economic systems are not serving the vast majority of people on the planet. Even the wellbeing of people with access to immense wealth is being undermined by the ongoing degradation of the environment, climate change and growing social divisions.

The good news is that all around the world, people are experimenting with ways to meet the needs of people more equitably and justly, while also regenerating natural ecosystems and addressing climate change.

The solutions to transform the status quo are already here, along with the technology, resources and expertise to implement them.

And yet at this crucial time, we are not on track.

Our political leaders remain paralysed by perceived opposition to change, unwilling to set meaningful targets and provide support to address the causes of climate change, inequality and environmental degradation. And while a growing number of people understand that the economy needs to change, very few have access to the knowledge, skills, resources and support they need to move from awareness to action.

The Next Economy has the tools to guide government, business, investors, workers and communities to manage economic change, while at the same time achieving meaningful climate action AND positive social and environmental outcomes. By working with people to develop strategies and access the knowledge, resources and expertise needed to implement them, we empower and connect key decision makers as they navigate economic change in an increasingly uncertain world.

Our History

The Next Economy was established in 2018 to support communities struggling with economic change to stimulate their economy in ways that protect and regenerate both people and the planet.

The idea for The Next Economy grew out of the work of the Founder at her previous organisation, The Centre for Social Change. After being asked to speak alongside financial analyst Tim Buckley in Mackay in 2014 about what communities could do to diversify their economy to protect themselves against changes in the international demand for coal, Dr Cahill became inundated with requests from coal mining areas in Queensland, New South Wales and Victoria to help them explore how they could manage the economic transition away from fossil fuels and towards renewable energy. What was most surprising about these requests was that the majority were coming from unlikely suspects: elected local government officials, heads of economic agencies and chambers of commerce, union representatives, state and federal government departments and industry peak bodies.

Amanda quickly realised that there was a huge gap in the current climate movement, in that most organisations were focussed on national campaigning and activism, or on developing and promoting technical solutions. Very few were talking about climate change as an economic opportunity that could create new jobs and industries, while also addressing a number of other challenges that regional Australia was facing, including ongoing droughts, population decline, workforce shortages and reduced services. Furthermore, in her visits to regional areas, Amanda started to see how climate change was increasingly being used to drive a wedge between rural and urban communities.

Concern about this growing division, along with ongoing political opposition to climate action and a growing demand for support to manage the already changing economies in coal regions led to Amanda establishing The Next Economy in 2018.

Our Supporters

On behalf of our Board, staff and the people we support, we would like to express our deep gratitude to all of those who make change possible through donating funds, services and time over the financial year 2019/20. Together we're transforming the economy!

Section 2 - Pathway to Impact

Our Activities

It has been just over 18 months since our last AGM, with the COVID pandemic postponing our planned 2020 AGM. Much has changed in this time, particularly for The Next Economy that has seen significant growth including:

- The establishment of the Transitioning Australia Group to assist in the delivery of services across Australia.
- A quadrupling of our income from \$137,896 in FY2019 to \$445,192 in FY2020.
- An expansion of TNE's profile nationally, with project activities extending across four states and two territories; extensive media coverage of our activities by the national press; and presentations delivered to around 20,000 people since June 2019.
- The establishment of more formalised systems in the areas of finance, risk management, HR, document control, CRM and project management to support the smooth function of the organisation.

Over this time, the TNE team worked across all economic sectors to accelerate the transition to a climate-safe, socially just and regenerative economy by:

	1	Supporting communities across regional Australia to develop plans and strategies that reduce carbon emissions while simultaneously creating good social and economic outcomes. We also connect them to the resources and expertise they need to implement those plans.
	2	Applying what we learn from regional projects by working with decision makers across industry and government (State and Federal) to develop new policies and frameworks for systems change.
	3	Inspiring the public to act by raising awareness about the range of solutions available to tackle climate change and regenerate the environment while creating a more prosperous, cohesive and peaceful society.
	4	Supporting and training people working across environment, climate, union and social service organisations to work more effectively with people across regional Australia for long-term mutual benefit and meaningful climate action.

Flagship Projects

Queensland Energy Transition Roadshow

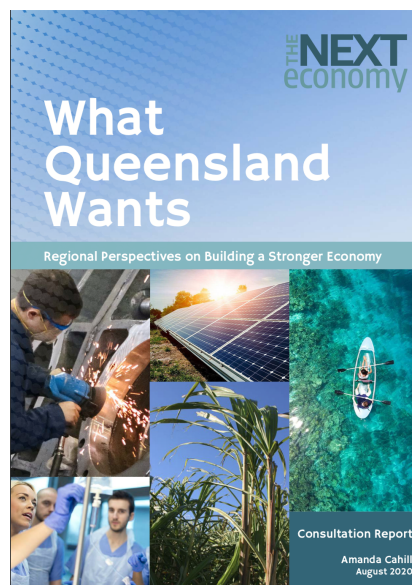

We worked with the Queensland government's Just Transitions Group to develop transition related policies and programs, including the Energy Transition Roadshow (in Rockhampton, Gladstone, Townsville and Cairns) funded by the Queensland Government in 2019/20. We also delivered additional forums in Townsville, Toowoomba and Kingaroy with the support of philanthropic donations. Overall we talked transition with over 450 Queenslanders and gathered their ideas on how to accelerate change in a sustainable and just way.

Through this work, we brought together all levels of government, industry, unions, universities, environment and community groups together to explore how the energy transition was impacting on regions and how it could generate new economic opportunities. The recommendations of these workshops were fed into government policy and generated significant local and state media interest.

What Queensland Wants Report

As the COVID pandemic hit, The Next Economy compile the many economic stimulus ideas we'd collected from across Queensland into a report called "What Queensland Wants". The report was well received by the State government, with a number of the recommendations being adopted as election promises.

The report also generated extensive media and public interest when it was released, garnering more than 62 media mentions, articles syndicated across 19 regional News Limited publications, 5 radio interviews and a regional television interview. The media attention in turn generated further interest from state and federal MPs.

The Next Economy also worked with a number of groups across the Hunter Region during 2019-2020, including **Hunter Renewal**, the **Gloucester Sustainable Futures Group** and the **Hunter Jobs Alliance**.

Influence

We've provided **expert testimonies** to four government inquiries on matters related to the energy transition and regional economic opportunities, in addition to holding meetings with ministers and key stakeholders in state and local governments, as well as industry bodies, unions and energy corporations.

Stanwell Energy Corporation strategic advice

We have been advising Stanwell in the development of their corporate strategy, which has led to the company not only integrating transition planning into their 5 year strategy but has also led to the development of a workforce and community engagement plan to enable the company to start talking about the inevitability of transition out of coal.

Qld Energy Policy

In the wake of the 2019 Federal Election, TNE was able to share the findings of previous transition strategy workshops undertaken in the Hunter Valley and Queensland to challenge the divisive rhetoric that all of regional Australia (especially Queensland) was actively opposed to and in denial of the energy transition. The results from the workshops were used in a widely-shared Guardian article written by CEO Amanda Cahill, that showed that many people were starting to accept that the transition is inevitable, and that there were a number of economic challenges across regional Australia that was exacerbating fear, uncertainty and division.

This article caught the attention of the Deputy Premier of Queensland, who was concerned about the growing division across the State. At the invitation of the Deputy Premier, Amanda participated in a community forum, where she challenged the government's view that they should avoid talking about transition. Subsequent meetings led to Amanda convincing the State Government to fund the Energy Transitions Roadshow mentioned above.

Civil Society Organisations

The Next Economy has also worked with a number of social service organisations, who are grappling with the implications of the energy transition and climate change for the vulnerable and marginalised groups they work with. This has included facilitating a range of training workshops for staff of the Red Cross and Brotherhood of St Lawrence, as well as providing strategic advice and presentations to The Australian Council of Social Services and Queensland Council of Social Services.

Education, Outreach and Awareness

- Worked with **12 regional communities across Queensland, NSW, Victoria, and Western Australia** to raise awareness and acceptance of the transition and to start to develop transition strategies, collaborations and initiatives. Most of this work has been in regions economically dependent on coal/gas mining and electricity generation, including the **Hunter Valley** in NSW; **Central Queensland, Townsville** and the **Darling Downs** in Queensland; and the **Latrobe Valley** in Victoria.
- Contributed to the development of and appeared in the film **2040** and consulted to Craig Reucassel on his influential documentaries **Fight for Planet A** and **Big Weather**. Also advised on a number of ABC initiatives covering climate change in 2019-2020, including the augmented reality app **“Mt Resilience”**.
- Between July and December 2019, we presented live to at least **15,000 people**, with recordings accessed by at least **50,000 people**. Highlights included:
 - Talking with Damon Gameau at a range of community screening events of 2040
 - Presenting with Bob Brown on stage at the La Trobe University’s Big Ideas event
 - A workshop at the Progress Conference in Melbourne
 - On a panel at the Impact Investing Summit
 - At the prestigious Australian Academy of Social Sciences
 - Hosting the webinar series: 2040 Conversations
- Generated significant and positive media coverage, including:

- Over **20 articles** written about the work of TNE and three opinion pieces that were shared across at least **30 news platforms** (including more conservative news sites such as News Limited)
- Over **20 radio interviews**, both local, regional and national radio programs
- **3 television interviews**, across both ABC and commercial channels

Building Capacity of the Movement

The Next Economy has trained over **300 people** working in environment, climate and social service organisations on how to work effectively with regional communities. This has included members of:

- Climate Action Network Australia
- Engineers Declare Network
- Australian Conservation Foundation
- Australian Red Cross
- Brotherhood of St Lawrence
- Hunter Renewal partners

Section 3 - How We Work

Structure and Governance

The Next Economy Ltd (ABN 97 617 344 126) is a public company limited by guarantee registered under Australian Corporations Act on the 13th February 2017. On the 4th of January 2018 the company was registered as a charity with the Australian Charities and Not-for-Profits Commission (ACNC).

The company has a donations sub-account with the Foundation for Rural and Regional Renewal, which provides deductible gift registry (DGR) status to The Next Economy Ltd. The company structure and governance balance The Next Economy's goal of agility with the need for transparency and clear accountability to its funders. A strong governance framework allows our lean organisation to maintain operating rigour.

Our People

The Board

Responsible for strategic oversight and the governance of the organisation.

1. **Lizze Brown**
2. **Amanda Cahill**
3. **Lisa Hyden** (outgoing)
4. **Jarra Hicks**
5. **Lauren Haas Jones**
6. **Sandi Middleton** (outgoing)

TNE Advisory Council

The Advisory Council acts as a 'brains trust' for the operations team and consists of leading experts across a range of different topics. Both the TNE Board and Staff are supported by an Advisory Council of respected experts including:

1. **Professor Katherine Gibson**, Institute for Culture and Society, University of Western Sydney
2. **Professor Marc Stears**, Sydney Policy Lab, University of Sydney
3. **Nicky Ison**, Energy Transition Manager, World Wildlife Fund
4. **Alex Kelly**, Communications Strategist

The Team

Dr Amanda Cahill, CEO

Amanda has spent over two decades working with inspiring people across Australia, Asia and the Pacific to create positive change on issues as diverse as economic development; public health, gender equality; and climate adaptation. The focus of her work at TNE is to support communities, government, industry and others to develop a more resilient, just and regenerative economy. Most of this work involves supporting regional communities in Australia to strengthen their economies by embracing the transition to zero emissions. She's also widely sought after as a presenter and media commentator and has appeared in a number of books and films including the film 2040.

Emma-Kate Rose, Program Director

Emma-Kate draws on over 30 years' experience working in business, social enterprise development, environmental sustainability, food justice and bottom-up economic development. In addition to her role at TNE, she also leads Food Connect, a social enterprise which has led the way in transforming the local food system, using principles of ecological agriculture to engage ethically with family farms and local communities for over 16 years. Emma-Kate is one of four Fellows of the Yunus Centre for Social Business at Griffith University. She is the immediate past President of Queensland Social Enterprise Council, where she helped secure philanthropic and government funding to coordinate a sector-wide strategy to scale impact across Queensland.

Dr Emma Whittlesea, Community Transitions Manager

Emma's professional focus has been in sustainability, community development and stakeholder dialogue, supporting community and economic transition. She has over 20 years' experience, working with communities and public, private and not-for-profit sectors within the UK, Europe and Australia. Emma worked as a Principal Policy Officer for the Queensland Government for over four years in the Department of Environment and Science, where she managed a variety of projects including a program to help Great Barrier Reef island communities transition towards a low carbon economy and increase their resilience. She is also an adjunct Senior Research Fellow with the Griffith Institute for Tourism.

Debbie Gibson, Administration and Executive Assistant to CEO

Debbie's a solution focussed & results driven administration professional with experience in public, private & NFP sectors in Australia, UK & South Africa. With over 30 years experience, she also has an Adv. Diploma of Management (HR), Diplomas of both Business and Management, a CertIV in Frontline Management and is a Rehabilitation & Return to Work Coordinator. Debbie's expertise lies in her ability to streamline and manage business processes. She's passionate about HR and business innovation.

The Transitioning Australia Group

Transitioning Australia Group (TAG) supports the operations team in their work with regional communities. The TAG provides a range of expertise that is not just technical, but also grounded in the lived experience of the different elements of the transition to a zero emissions economy. Currently, the TAG consists of six committed members, with plans to expand the group.

Wendy Farmer, Voices of the Valley

Dan Musil, Earthworker Cooperative

Julie Lyford, Gloucester Environment Group

Ron Ipsen, Voices of the Valley

Dr Jarra Hicks, Community Power Agency

Kristy Walters, Community Power Agency

Section 4 - Our Finances

The financial report for this Annual Report demonstrates the extent of the work undertaken by The Next Economy over the 2019-20 year. In particular, the report shows the alignment between our financial and strategic priorities alongside the impact we aim to achieve. The following pages contain the fully audited report.

Profit and Loss Statement

The Next Economy Limited

Thanks

Our activities are contributing to systems change in a nation facing the growing threat of economic disruption in the face of climate change. We could not accomplish our impact without the support, involvement and enthusiasm of our funders and partners.

Our impact is your impact. We are grateful for your significant contributions and will continue to harness the power of community as we continue to grow and create change.

We look forward to supporting communities to build collective action across the nation to harness change for the better.
